CITY OF ROCKFORD 2019 STREET IMPROVEMENT PROJECT START OF CONSTRUCTION

Construction on the 2019 Street Improvement Project will begin shortly with the contractor anticipating to begin work on the project around the first week in August. Street milling, curbing replacements and street paving is expected to be completed in August with turf restoration being completed in September.

During the construction project access to the streets and homes will be maintained throughout. A select number of homes will have the curbing replaced in front of the driveways in which access to their driveway will be restricted for a period of several days while the concrete curbing sets. These affected homes will be notified individually ahead of this occurring and project representatives will discuss access with these homeowners.

When the final pavement is placed, no on-street parking will be allowed during these days as to ensure the highest quality construction of the roadway is achieved. Notifications will be provided prior to this, informing homeowners of the times and additional information on the parking restriction.

During the project, maintaining safety is of the highest priority for the city and the contractors working on the project. Please be mindful of the construction equipment during this time and don't enter the areas in which the construction is occurring. When driving through the construction site, drive slowly and use caution.

After the construction has been completed, the disturbed areas will be regraded, topsoil added if needed and hydro seeded. With the hydroseed, the seed and mulch will be spray applied at the same time. After this has been completed, residents should water these areas if possible, to ensure high highest quality turf is restored in as quick of a timeframe as possible.

If you have questions through the construction process, please direct all questions to Adam Noreen (612-214-5016) who is the City of Rockford project representative.

As a portion of this project is being assessed to the abutting properties, an assessment hearing will be held after all construction activities have been completed. At that time, final assessment amounts for the properties will be presented. No date has been set for that meeting and additional notices will be provided prior to it occurring.
